**Art Unit: 3621**

**DETAILED ACTION**  
**RESPONSE TO AMENDMENT**

1. This Office action is in response to Applicant's amendment, filed on 12/19/2002.
2. Claims 13-19 are remained and claims 20-23 are added.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-23 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Sasou Hideyuki (JP59105155) in view of Yajima Tatsuo (JP1044520).

As per claims 13-19, Sasou Hideyuki substantially discloses a system/method for eliminating fault in a private circuit (which is seen to read as Applicant's claimed invention), comprising:

means for accepting an instruction for controlling and managing computer via a network (see., abstract);

controller for converting said instruction into a signal (see., abstract);

means for performing control (see., abstract);

**Art Unit: 3621**

means for detecting a result and state (see., abstract);

means for transmitting said detected result and state from said detecting means to said managing computer via said network (see., abstract). It is to be noted that Sasou Hideyuki fails to explicitly disclose that the test management is for controlling a power unit. However, Yajima Tatsuo discloses at a reserved rise time, an interruption is generated from a timer to a microprocessor and power is supplied to respective apparatuses (see., abstract). Accordingly, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to include a power unit into the teaching of Sasou Hideyuki in order to provide an autonomous power unit test function.

### **RESPONSE TO ARGUMENTS**

6. Applicant's arguments filed on 12/19/2002 have been fully considered but they are moot in view of new ground (s) of rejection (IDS filed on 9/17/2002, paper # 8).

### **CONCLUSION**

7. Any inquiry concerning this communication from the examiner should be directed to Pierre Eddy Elisca at (703) 305-3987. The examiner can normally be reached on Tuesday to Friday from 6:30AM to 5:00PM.

If any attempt to reach the examiner by telephone is unsuccessful, the examiner's supervisor, James Trammell can be reached on (703) 305-9768.
